

Name _____ Hour _____

First Day of School Survey!

Please help your teacher get to know you better and be a better teacher for you this year! Provide your teacher with information that will help her plan lessons and activities around you, your needs, and learning style! Take your time and remember the more details and information you can share the more likely you will be to enjoy math this year!

1. What are two areas of math that you did really well in last year?
2. What are two areas of math that you need improvement in?
3. What are two things that your teacher did last year that really worked for you?
4. What are two things that you would have liked to change about math class last year?
5. What can I do to motivate you this year in math?
6. What kind of learner are you? (Example: listen and take notes, work with a partner on an activity, work alone...)
7. What do I need to know about you to be a better teacher for you?
8. Tell me about your interests and hobbies outside of school.
9. What questions or concerns do you have about 8th grade math?
10. One thing I really want my math teacher to know about me is:

11. Do you have internet access at home?

12. How dedicated to this class are you?

13. I assume that you have mastered the following topics: add, subtract, multiply, and divide with fractions and integers. How comfortable are you with those topics?

14. In Algebra we do not spend a lot of time on the same topic and we do not review a lot of material. Once you learn a topic, it is expected that you remember that skill. How does that make you feel?

15. How will you get your questions answered?

16. What do you need from your Algebra teacher to be successful?

17. What will you do to make sure you are successful in Algebra?
